

Index to Chicago Sprue Stretcher Library

The following is a compilation of IPMS chapter newsletters and publications that the Sprue Stretchers have collected over the years through trading PNI, exhaustive searches at swap meets or good old fashioned subscriptions. What is listed below in each issue are the more substantial aspects of that issue. Most issues carry a short review or two but seeing that most of these pubs are from the mid 70's to the mid 80's, the reviews are not that timely; and in all honesty not that good. For those reasons, the subjects of those reviews are not listed.

If you see something you could use or would like to see, just ask. I do ask that you return the material in a timely manner. These are rare out-of-production publications and their replacement would be next to impossible. If you have any publications that could fill the vast gaps in this collection please let any club officer know so we can have a copy made for the club library.
